## Alamos Gold Inc. Provides Operations Update

Toronto, Ontario - Alamos Gold Inc. (TSX: AGI) ("Alamos" or the "Company") provides an update on its operations at the Mulatos gold mine in Sonora, Mexico.

Production has increased since the end of the third quarter, a period characterized by above-average rainfall. Crusher throughput in October was 27% higher than the third quarter average, while gold production of 9,200 ounces was 26% higher. Crusher throughput in November was higher than in October and gold production was approximately 10,050 ounces (before refinery settlements), 37% higher than the third quarter average and 9% higher than in October. The Company is currently on track to achieve its fourth quarter gold production target of 30,000 ounces and to complete the stacker-conveyor system in the first quarter of 2008.

### About Alamos

Alamos is a Canadian-based gold producer with operations, exploration and development activities in Mexico. The Company employs approximately 400 people in Mexico and is committed to the highest standards of environmental management, social responsibility, and health and safety for its employees and neighboring communities. Alamos is fully leveraged to increases in gold prices. Alamos' common shares are traded on the Toronto Stock Exchange under the symbol "AGI" and convertible debentures under the symbol "AGI.DB".

### **Cautionary Note**

No stock exchange, securities commission or other regulatory authority has approved or disapproved the information contained herein. This News Release includes certain "forward-looking statements". All statements other than statements of historical fact included in this release, including without limitation statements regarding potential mineralization and reserves, exploration results, and future plans and objectives of Alamos, are forward-looking statements that involve various risks and uncertainties. These forward-looking statements include, but are not limited to, statements with respect to anticipated commencement dates of mining production, mining and processing of mined ore, achieving projected recovery rates anticipated production rates and mine life, operating efficiencies, costs and expenditures and conversion of mineral resources to proven and probable reserves, and other information that is based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management.

Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects" or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "estimates" or "intends", or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved) are not statements of historical fact and may be "forward-looking statements." Forward-looking statements are subject to a variety of risks and uncertainties which could cause actual events or results to differ from those reflected in the forward-looking statements.

There can be no assurance that forward-looking statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from Alamos' expectations include, among others, risks related to international operations, the actual results of current exploration activities, conclusions of economic evaluations and changes in project parameters as plans continue to be refined as well as future prices of gold and silver, as well as those factors discussed in the section entitled "Risk Factors" in Alamos' AIF (Form 20-F as filed with the United States Securities and Exchange Commission). Although Alamos has attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.
